Hazardous Weather

Hazardous Weather

Thursday: Afternoon and Evening Storms

Weather Forecast Office
Amarillo, TX
Issued Aug 06, 2020 3:33 AM CDT

There is a small chance for thunderstorms this afternoon and evening across the Panhandles. If storms develop, they will be capable of generating damaging wind gusts and locally heavy rainfall in addition to lightning.

Hot Summer Day

Weather Forecast Office
Lubbock, TX
Issued Aug 06, 2020 2:50 AM CDT

Storms develop west in the afternoon, then spread eastward

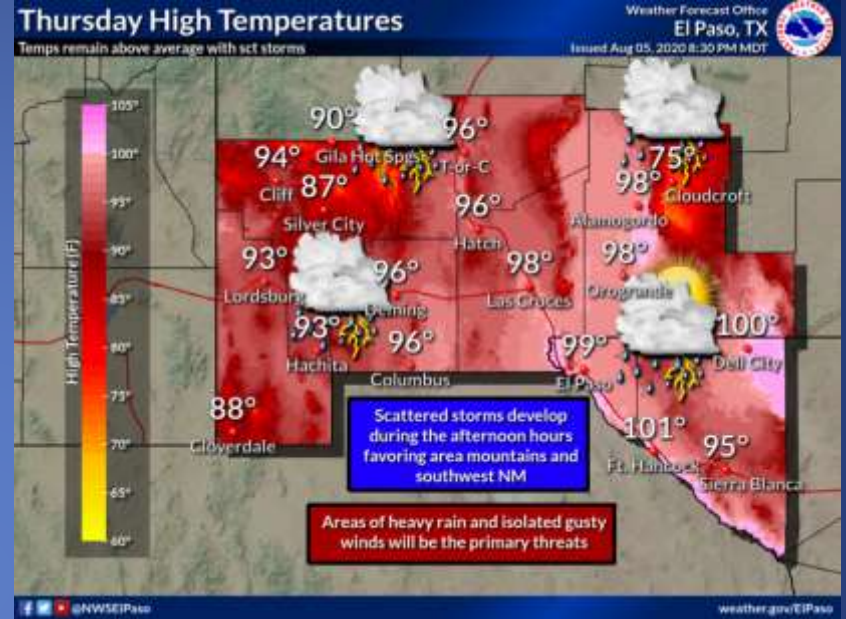

It is going to be a hot summer afternoon with temperatures peaking near the 100 degree mark area wide. The heat will help generate isolated to scattered thunderstorms across the southwest Texas Panhandle and western South Plains mid-late afternoon. This activity will spread eastward through the evening hours before fading. The most intense activity will be capable of generating wind gusts to 65 mph, small hail and brief heavy rainfall.

Hazardous Weather

It will be mild, with lows in the upper 60s to middle 70s. Isolated to scattered thunderstorms will move eastward across the South Plains before fading by late evening. The most intense activity will be capable of generating downburst winds to 65 mph, small hail and brief heavy rain.

Scattered thunderstorms develop during the afternoon hours with the favored zones being area mountains and southwest New Mexico. Isolated to scattered storms will be possible across the lowlands as well, especially if outflow boundaries collide in a favorable fashion. Areas of heavy rain and gusty winds will be the primary threats with the strongest storms. Temperatures remain above average across much of the region.

Hazardous Weather

Thursday Highs / Rain Chances

Rain chances and high temps from 7am to 7pm Thursday

Weather Forecast Office
Lake Charles, LA

Issued Aug 06, 2020 3:08 AM CDT

Thursday: Another mild summer day with isolated to scattered thunderstorms possible. Otherwise, expect partly cloudy skies with winds remaining variable and fairly light.
